4) Interview Summary (PTO-413) Paper No(s).

5) Notice of Informal Patent Application (PTO-152)

Art Unit: 3637

DETAILED ACTION

Information Disclosure Statement

The listing of references in the specification is not a proper information disclosure statement. 37 CFR 1.98(b) requires a list of all patents, publications, or other information submitted for consideration by the Office, and MPEP § 609 A(1) states, "the list may not be incorporated into the specification but must be submitted in a separate paper." Therefore, unless the references have been cited by the examiner on form PTO-892, they have not been considered.

Drawings

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the first lock which is disclosed as including a mounting rod and the pivotal mounting of the front plate to the base frame must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-3 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Terms which make the claims indefinite include: "its" in claim 1.

Art Unit: 3637

Claims 1-4 are rejected as failing to define the invention in the manner required by 35 U.S.C. 112, second paragraph.

The claim(s) are narrative in form and replete with indefinite and functional or operational language. The structure which goes to make up the device must be clearly and positively specified. The structure must be organized and correlated in such a manner as to present a complete operative device. For example the lid covers the container but a lock secures the lid to the base. What besides the container connects the lid to the base? For example a vertical front wall pivots about a lower edge "when released by relative upward movement of the ... container". How can a lower(?) edge be released when nothing has been defined which engages the edge? For example the first lock is for "preventing upward separation of said container from said base" and the second lock is "preventing unauthorized upward lifting separation of said container relative to said base". So basically the locks are redundant both serving the same function. In claim 2 it is not clear what the "vending condition" is or what secures the front wall against vertical movement.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 3637

Claims 4, as presented, are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Schwarzli. In Schwarzli a bin 14 is secured to a base 16 using a first keyed lock 165, 175-178 in a lid 13, a second lock 50 movable to engage a projection 57, 45, 42 to prevent separation of the door assembly 34 edges from the bin edges.

Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

The factual inquiries set forth in *Graham* v. *John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

- 1. Determining the scope and contents of the prior art.
- 2. Ascertaining the differences between the prior art and the claims at issue.
- 3. Resolving the level of ordinary skill in the pertinent art.
- Considering objective evidence present in the application indicating obviousness or nonobviousness.

As best understood claims 1-3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Schwarzli as applied to claims above and further in view of the ordinary skill of one versed in the art. Generally a reversal of parts in a device is considered to be within the ability of one having an ordinary skill in the art. In Schwarzli with the lock 50 engaging the bottom 40 of the front wall, the front wall pivots about the

Art Unit: 3637

top edge of the assembly 34. The reverse of this is to place the lock at the top so the front wall pivots about the lower edge. It would have been obvious for one having an ordinary skill in the art to have modified Schwarzli by reversing the position of the lock placing it at the top of the front panel as an obvious matter of design choice.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Bolen and Glaser

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jerry Anderson whose telephone number is 703 038 2202. The examiner can normally be reached on Monday-Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Lanna Mai can be reached on 703 308 24668. The fax phone numbers for the organization where this application or proceeding is assigned are 703 305 3597 for regular communications and 703 306 4195 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703 308 2197.
